Deep & High Stress Mining 2007 Poster Information

Dear Poster Author,

The Australian Centre for Geomechanics invites you to present an overview of your paper at the designated Deep & High Stress Mining 2007 Poster Session.

The Poster Session will be held at the Novotel Langely Hotel, Perth.

There will be one poster session featuring approximately 7 posters on first day of the Seminar. At the commencement of this day, the morning chairperson will announce the poster session and provide a one-minute overview of each poster to be presented on that day. It is envisaged that this will encourage many attendees to attend the poster session.

A poster number will be assigned to you, in due course. This number will be displayed on the panel where you are to display your poster. You are required to bring your own Velcro dots to mount the poster. Please see Josephine at the ACG’s Deep & High Stress Mining 2007 registration desk for details as to where to place your poster.

No audio visual equipment will be supplied for poster presentations.

Please note that the event organisers are not responsible for any poster set up or poster material left at the event. The set up and take down is solely the responsibility of the author.

Poster Session Viewing Time
An announcement will be made at the commencement of the Seminar to inform the attendees when and where the Poster Session will take place. Poster authors are requested to be present beside their poster during this time in order to speak about their work. Please note that this time may change due to programme alterations.

Poster guidelines
- Authors are requested to be in attendance at their poster to discuss the points with delegates during the scheduled viewing session.
- The panels are made of a material to which Velcro can adhere.
- The maximum size of the poster is A0 (890 x 1189 mm).
- The poster should be in a portrait format.
- The title of your paper should be clearly visible.
- The paper is included in the proceedings so please do not try and reproduce it in poster format. We suggest that you select the most important figures/tables. Minimise text and focus on the visual aspects.
• Posters should reflect the technical/scientific contribution and should not be an advertisement for a product or service.

We very much look forward to welcoming you to Perth, Western Australia in November. Please do not hesitate to contact the ACG if you have any queries.
