

CSIRO's Wealth from Oceans National Research Flagship and the Western Australian Marine Science Institution (WAMSI) invite you to attend the second WAMSI Node 1 research symposium.

# wamsi

## node 1 symposium

### Strategic research on Western Australian marine ecosystems

Thursday 30 July 2009 8.30am-6pm CSIRO Auditorium, Underwood Ave, Floreat

8.30am: Registration

9am: Welcome

5-6pm: Sundowner

WAMSI Node 1 research focuses on:

- characterising the Western Australian coastal marine ecosystem structure and function; and
- enhancing our shared capacity to understand, predict and assess ecosystem response to manmade and natural pressures.

The symposium will include presentations on benthic ecological process studies and biophysical and biogeochemical observations and modelling in south-Western Australia.

We anticipate that outcomes from WAMSI Node 1 will contribute strongly to ecosystem-based, multiple-use management of Western Australia's marine and coastal environment.

Please join us for the opportunity to be informed about the latest research findings and discuss opportunities for translating research findings into policy and management outcomes. The symposium will also provide an opportunity to discuss management implications and to enhance collaboration among other WAMSI research nodes and with the broader science community in general.

RSVP by Thursday 23 July to CSIRO Enquiries via email [enquiries@csiro.au](mailto:enquiries@csiro.au) or phone 1300 361 822
